Dies and Moulds

Precision engraving of free issue dies and casting for machine parts, cast metal nameplates, decorative moulds for food manufacturers, injection moulding, electrical components, leather goods and many other applications.

Mimic Diagrams

Engraved or screen-printed (surface or reverse) on plastics and most materials. On site overprinting of cabinets undertaken.

Key pad overlays, sub-surface printed, provides a wear resistant covering to suit most environments.

Plaques

We produce a wide range of plaques, available in most metals or perspex, which can be screen printed, engraved or chemically etched. We offer the use of a wide range of colours, meaning we can easily include your logo's in the design. As you can see from the Parachute Regiment plaque below we can also use hand crafting techniques to produce emblems for extra special occasions.

Finally we can supply the finished plaque on a wooden backing board (wood of your choice) in a glass casting or simply with pre-drilled fixing holes, with the option of curtain hire if you require it.
